

WORKHORSE 725™

WORKHORSE 725

Information and Specifications

An ideal trailer when larger water capacity is necessary for fire or dust control on construction, industrial or agricultural job sites, farms or ranches. This 725 gallon trailer can be custom ordered in a "gooseneck" style or with a black polyethylene tank that will protect the water inside from ultraviolet rays and prevent algae growth. This heavy-duty trailer comes with a 2" contractor duty *MultiQuip™* pump; 4 horsepower *Honda™* motor and 2" rear spray bar providing coverage up to a 30' wide area. Standard features also include side spray, garden hose bib, hydrant fill pipe, self-loading (drafting) capability and potable water outlet.

Other options include 2000 PSI pressure washer, a heavy-duty hose reel, a generator and *Rainbird™* tripods for extended reach applications.
